

# The New G3 Pump – Only From Graco

## Up to 5100 psi / 352 bar

- Delivers full performance with NLGI #2 grease, and Oil.

## AC and DC Power Models

- 12/24VDC and 90-240VAC deliver same industry leading performance

## Up to Three Pumps

- Ability to meet both small and large system output requirements

## Adjustable Output Pumps

- Three output settings allow you to size the system to meet specific lube requirements

## Three Control Choices

- Use customer's PLC, establish a timed lube cycle, or use the Max Control to create a custom fit

## Multiple Reservoir Sizes

- Five sizes enable you to meet specific application requirements

## Two Reservoir Types

- Stirring paddle with wiper arm keeps grease from separating
- Follower plate with stirring paddle for extreme angle operation

## Multiple Fill Ports

- Three fill ports allow you to install multiple connection types on the same unit. Oil fill port on top.

## Flexible System Types

- Ready to use with both series progressive or injectors

## Data Management System

- Optional DMS to track critical pump data for easy lube system diagnostics
