WHY CHOOSE FSI?

Safety is No 1.

FSI is strongly focused on internal and external safety procedures. It is our priority and overriding duty to ensure the health and safety of our employees and clients.

Customer Relationship

FSI provides a strong commercial relationship with our valued customers and suppliers which is further developed and enhanced with timely group meetings.

FSI Training

FSI's training department provides excellent training opportunities for all staff within our Brisbane and Moranbah facilities, focused on providing certified multi skilled technicians capable of delivering a greater level of service support to our customers.

Product Support

FSI have a team of highly trained and qualified staff, alongside a vast national and global distributor network capable of providing 24/7 service for guaranteed product support when you need it.

Innovation & Technology

FSI continue to invest in technology with the recent addition of a new software program providing increased inspection and audit reporting and forecasting efficiencies, the release of our new indicator and shutdown panel assembly which provides latest technology benefits, increased reliability and serviceability.

Australian Made & Australian Owned Global Fire Solutions.

FSI offers a complete range of fire detection and suppression products to suit any commercial or industrial application. From smoke detectors and fire indicator panels to foam systems on large scale mining equipment, FSI can offer a solution for your highlighted fire risks. All FSI products are designed and certified to Australian Standards and adhere to recognised legislative requirements including our new range of Fluorine Free (F3) fire protection.

With the legislative reclassification of AFFF products FSI can also help with removal, disposal and fire system conversion strategies to minimise disturbance to production and downtime.
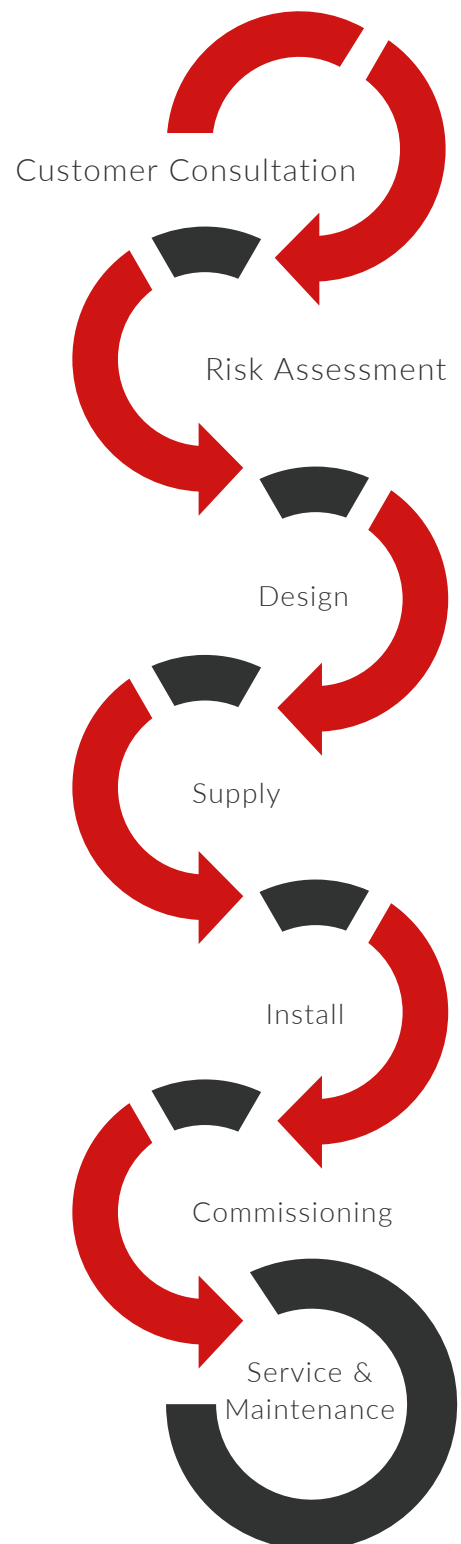

Whether it's a low temperature environment, electrical or hydrocarbon risk FSI and our global distribution partners have a solution for your fire protection needs.

Our Product

F ire is an ever present threat that can result in losses to human lives, capital equipment and production, because of this adequate fire protection is a critical necessity and should form part of any company's risk management plan.

FSI has formed strategic alliances with specialist manufacturers of fire detection and suppression equipment globally and are able to offer the latest in technically advanced fire protection solutions.

Foam-Guard Fluorine Free (F3) Fire Suppression System

Fire & Safety Industries has developed its own state-of-the-art system called the 'Foam-Guard Fluorine Free (F3) Fire Suppression system' which is fully accredited by ActivFire and complies with Australian Standard AS5062-2016.

The system was developed after significant consultation with industry, machinery manufacturers and contractors in conjunction with in-field trials to achieve arguably the most advanced Fluorine Free (F3) fire suppression system on the market.

The Foam-Guard Fluorine Free (F3) Fire Suppression System can be configured to suit all applications. Each application is individually assessed to identify all fuel and ignition sources and the system is then designed and installed to ensure optimum coverage of all risk areas.

All installations include 24 hour support and are available with full service & maintenance plans to ensure system longevity.

Fixed Services

Fire & Safety Industries has a complete range of products for protection of fixed assets and special hazard applications. From sensitive data processing facilities and priceless artworks, to oil refineries, explosion prevention and other critical processes, FSI can supply you with a solution for all of your fixed asset protection requirements.

- Alarms & Detection

- VESDA Systems

- Gaseous Systems

- Water Mist Systems

- Flame Detection

- Foam & Explosion Suppression

- Sprinkler & Deluge Systems

- Conveyor Protection Systems

FSI Fire Equipment

Fire & Safety Industries provides its customers with more than just the Foam-Guard Fluorine Free (F3) Fire Suppression System, providing a range of ancillary firefighting products to further minimalize the devastating effects of fire to both people and capital.

Our range on ancillary products includes:

- Fire Extinguishers
- Fire Hydrants
- Fire Blankets
- Hose Reels and Nozzles
- Lay Flat Fire Hoses
- Smoke Alarms
- Signage
- First Aid Kits

Other Applications

FSI offers an extensive range of products to suit all applications.

- Mining
- Construction
- Electrical
- Forestry
- Transportation
- Quarry Industry
- Marine
- Agriculture
- Drilling
- Vehicle
- Gaseous Systems
- Generator Sets
- Industrial
